Easy application +

Does not require drying +

Immediately ready +

## LIQUID

- Average application in **15 min. about**

- Use of liquid, risk of infiltration

- Use of chemicals products

- Costs of liquids

- Lack of practicality in the application

- Drying with hairdryer

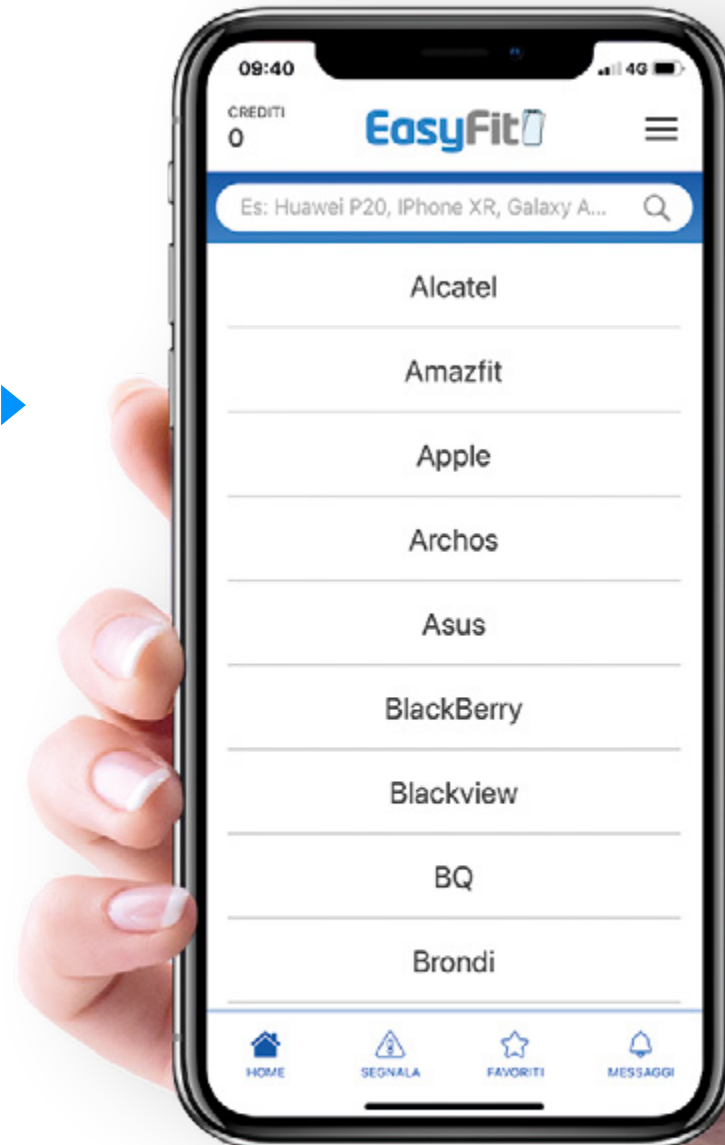

- Long wait before use

# Quick and easy application

- ✓ Place the film in the guides
- ✓ Select the model from the **EasyFit App** ▶
- ✓ Launch the cutting procedure
- ✓ Apply the film
- ✓ **IMMEDIATLY READY!**

**READY IN  
4 MINUTES**

# Why EasyFit?

Guide the customer to choose the ideal product

- It is technology that has nothing to do with older generation films. In fact, calling it film is very simplistic.
- Other types of protection have a slight lateral thickness. EasyFit, on the other hand, is almost invisible and despite this, it offers high impact protection.
- The sensitivity of the touchscreen remains unchanged and is compatible with the latest generation of fingerprint readers.
- It is ultra transparent and leaves the brightness of the display unchanged.
- Case friendly, the thickness reduced to a minimum allows it to be applied without detachment problems.
- Even after a fall, it continues to offer high protection without the need to replace it.

EasyFit 

# Protection for every need

## Ultra Transparent

**Thin and invisible, resistant to scratches** and accidental bumps. The perfect solution for those who do not want to change the appearance of their device.

## Protekta / Premium Quality

Ultra resistant film, composed of **regenerating molecules** that allow it to repair scratches on its own and surface damage, keeping the device protected.

## Anti Blue Ray

Thanks to its composition, it creates a **filter that rejects the blue rays of electronic devices**, protecting the eyes from fatigue.

# Protezione per ogni esigenza

## Privacy Effect

**Complete protection even from prying eyes.**

It only takes a few degrees of tilt to prevent you from seeing what is displayed on the display.

## Matte Effect

Surface with **mat anti-reflection treatment** for better reading and to give a unique look to your smartphone.

## Glass no Glass

Thanks to a special composition and the use of Easyfit curing lamp, hardens the film obtaining a **tactile effect similar to tempered glass.**

# EasyFit is also customization

The back film that changes your look!

*Back Skin*

EasyFit, in addition to providing maximum protection, changes the look of your smartphone. With variants in fine finish for a hyper realistic effect and semi-transparent films with glossy relief effect.

**Compatible with wireless charging!**
